CORPORATE SOCIAL RESPONSIBILITY

As a responsible organization Allied Piantis is committed to making a real difference in society through it's CSR role. We believe in caring for people and the environment and have introduced many sustainable initiatives. Some of our recent initiatives include.

- ✓ Tree plantation drive. 500,000+ trees planted across Pakistan in collaboration with the Government of Pakistan (GOP) and local horticulture authorities.
- ✓ Amidst the recent global pandemic, we extended our support to the front-line workers, hospitals and governmental units by distributing WHO (approved) hand sanitizers and Personal Protection Equipment (PPE) across Pakistan free of cost.
- ✓ Distributed thousands of ration food bags to our painter fraternity and their families during the 2020 COVID economic crisis.

Our Journey

Allied Piantis, the manufacturers of Lomond Paints and Gobi's Paints, was established in 1981 with the spirit to deliver premium quality coating products to customers in Pakistan. After a remarkable four decade journey, it stands today as one of the leading coating manufacturers of Pakistan.

We offer a comprehensive portfolio of decorative and protective coats, industrial paints, auto refinish and construction chemicals that have set standards in the industry.

With 40 years' experience in the coating industry, we continue to serve our clients with the finest coating product range with the firm belief that colours have the power to transform lives.

We use state-of-the-art European technology to provide pioneering, high-quality and sustainable solutions to the public. We have an established distribution network covering more than 500 destinations in Pakistan and are exporting to countries across the globe including the United Kingdom, Europe, GCC states and Africa.

QUALITY CONTROL

Allied Paints, the manufacturers of Lomond Paint and Gobi's Paints, a ISO 9001 : (2008) certified company that strictly adheres to supreme UKAS and PNAC quality control standards.

SUSTAINABILITY

We are devoted to ensuring continuous improvement and operational excellence that supports sustainable growth and development and is reflected in our integrity, safe work environment, environmental conservation efforts, innovating solutions and communal welfare contributions.

DIVERSE AND HIGH QUALITY PRODUCT RANGE

We use the finest natural, organic and safe synthetic dyes to develop an outstanding coating variety featuring authentic colours, high covering power and durability.

For us, like you, walls hold endless possibilities. Whether it be the moodiness of a velvet grey coating that brings a smoky and texturally rich allure, or playful patterns of gritty bright colours; once painted each wall must come to life and speak for itself.

Choosing a colour palette is the most important part of decorating homes. Use your colour wheel to create a colour scheme that best fits your personality.

MONOCHROMATIC

The monochromatic colour scheme uses tone on tone of the same color with the addition of white or black to lighten or darken the colour. This creates a classic and often soothing palette.

CONTRAST

The contrast scheme is more dramatic. Often a triad of contrasting colours are used, such as green-orange and green-blue. This introduces more colours and energy into your home's palette.

Tredney colour combos

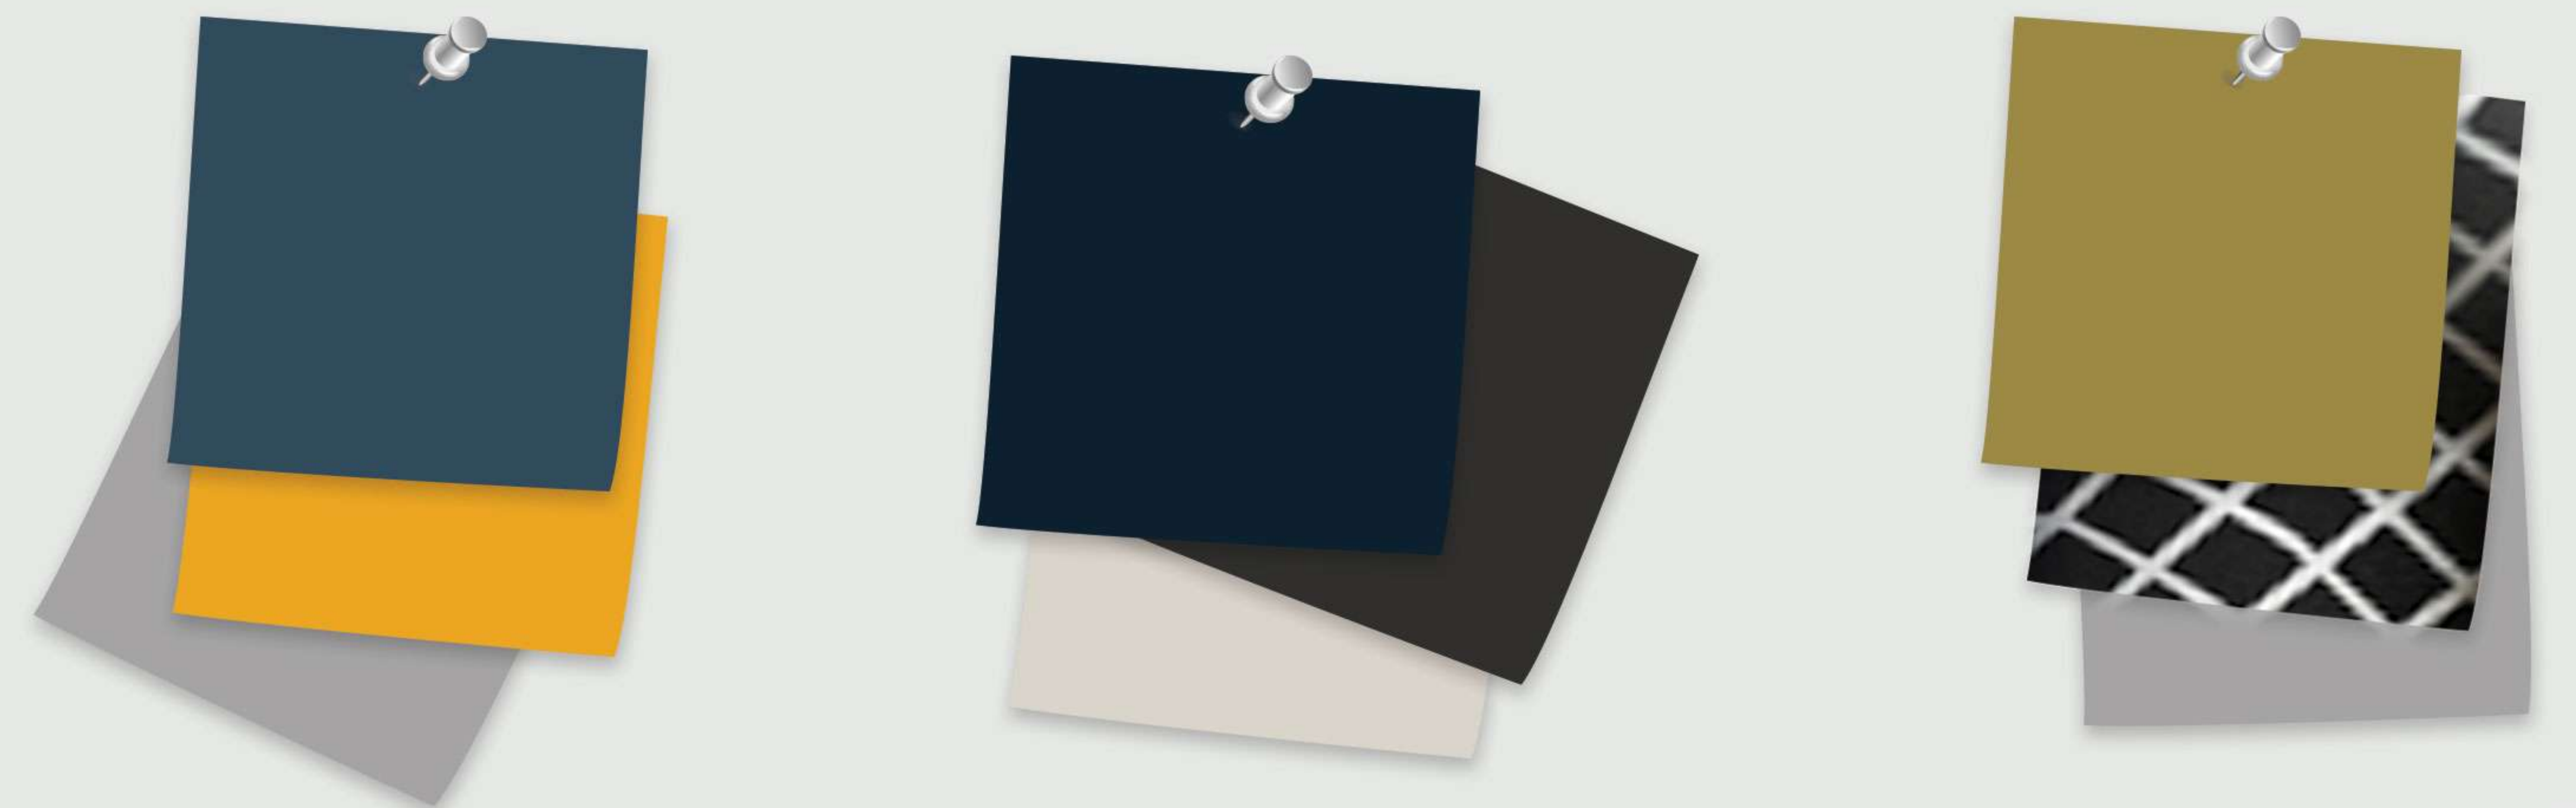

ANALOGOUS

The analogous scheme uses colours that appear next to each other on the colour wheel. This creates a colourful and often soothing palette.

COMPLEMENTARY

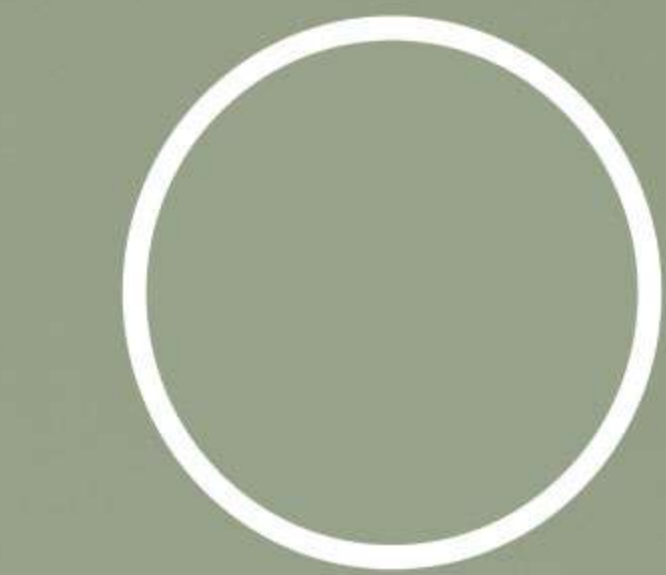

The complementary scheme is where two opposing colours, such as blue and orange, are used together to create a dramatic, bold and high energy colour scheme.

MATT FINISH

INTERNAL WALLS & CEILINGS

High opacity paints that create a focal point in spaces that draw attention by introducing subtle colors to a tonal scheme. It combines the luxury of a smooth, matt finish with exceptional coverage and durability.

PAINT ESSENTIAL

We're always on the lookout for stuff to help us do our painting jobs better and faster. We scour the shelves of paint stores, surf the net and pick the brains of painting pros to find the latest and greatest, as well as the best classic tools and gear.

PREP AND PRIME

Paintbrush

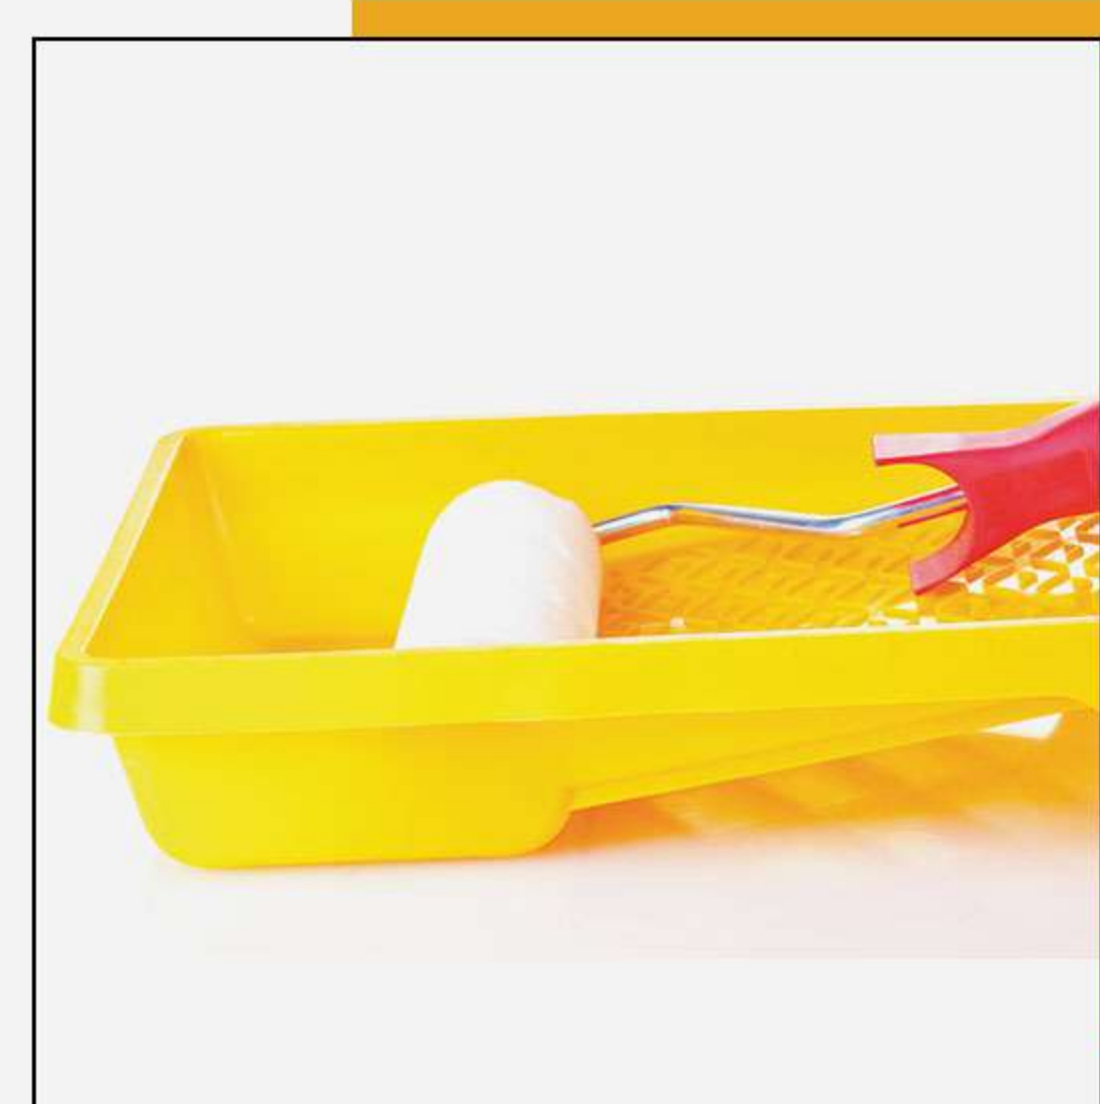

You'll probably want to use a roller to cover the large portions but paint brushes are ideal for smaller areas and for edging

Roller

If you have a lot of area to cover, nothing beats a paint roller. Natural rollers like wool are good for oil-based paints, while synthetic rollers like nylon are based for water based. The shorter the roller's nap, the smoother the finish

Paint Tray

A paint tray is a must if you're using a paint roller. Dip your roller in the paint well, then roll it back and forth on the ribbed slanted surface, to distribute and remove the excess paint before rolling it on your walls

Sanding Sponges

You will need a sponge to effectively apply the wall cleaner to your walls and other surfaces. Ensure that the sponge is brand new and that you've chosen a good quality one.

Roller Extension Pole

An extendable two-foot roller extension should work in most spaces, but keep the height of your ceiling in mind when shopping for supplies.

Sturdy Ladder

A standard six-foot aluminum or fiberglass ladder that fits your weight specifications (don't forget that you need to add on approximately how much you'll be carrying up it) is a good investment piece.

Drop Cloth

Drop cloths are critical to preserve floors and furniture when painting. Canvas cloths are the most expensive, but they'll last long and absorb paint when it spills. Plastic drop cloths are lightweight and reusable, but if paint spills on them it'll pool, unlike canvas cloths.

Filling knife

It has a flat edge for scraping and applying putty in holes; a nail-puller opening; a pointy edge for cleaning out cracks, removing caulk, and opening paint cans; a hammer handle for closing them; and a curved surface for removing paint from rollers before cleaning them.

Wall Cleaner or dusting cloth

You want to work with a clean surface since a dirty wall could prevent the paint from adhering or cause the paint to bubble. For Spic and Span, with a little bit of water and a sponge to get any surface dirt off the walls before paint,

Painter's tape

While purchasing a quality painter's tape like 3M or Frog tape is important, it's more about how you apply it. Once it's on the wall, run a damp rag over the edge to create a seal.
